ELSEVIER

Agricultural and Forest Meteorology 75 (1995) 283–284

AGRICULTURAL AND FOREST METEOROLOGY

Contents of Volume 75, 1995

VOL. 75, NOS. 1–3 JUNE 1995

Research Papers

Mean flow and shear stress distributions as influenced by vegetative windbreak structure
R.C. Schwartz, D.W. Fryrear, B.L. Harris, J.D. Bilbro and A.S.R. Juo 1

Measurements of transpiration from savannah shrubs using sap flow gauges
S.J. Allen and V.L. Grime 23

Soil surface heat flux: some general questions and comments on measurements
C.L. Mayocchi and K.L. Bristow 43

Surface conductance of Amazonian pasture: model application and calibration for canopy climate
I.R. Wright, A.O. Manzi and H.R. da Rocha 51

The inscrutable mandarin
K.J. McAneney, A.C. Richardson, M.S. Astill and P.A. Anderson 71

Computer stereo plotting for 3-D reconstruction of a maize canopy
N. Ivanov, P. Boissard, M. Chapron and B. Andrieu 85

Simulation of light interception from a maize canopy model constructed by stereo plotting
B. Andrieu, N. Ivanov and P. Boissard 103

Energy fluxes from heterogeneous terrain: averaging input parameters of the Penman–Monteith formula
H. Braden 121

Simulated canopy microclimate using estimated below-canopy soil surface transfer coefficients
T.J. Sauer and J.M. Norman 135

Measurement of heat and vapor transfer coefficients at the soil surface beneath a maize canopy using source plates
T.J. Sauer, J.M. Norman, C.B. Tanner and T.B. Wilson 161

An improved stem heat balance method using analog heat control
F.-P. Weibel and K. Boersma 191

Software Review

Agricultural experiment stations and global climate change 209

Invitation to network

Progama de la Paz 213

FORTHCOMING PAPERS

Scattering of untraviolet and photosynthetically active radiation by sorghum bicolor: influence of epicuticular wax
R.H. Grant, M.A. Jenks, P.J. Rich, P.J. Peters and E.N. Ashworth

Wind fluctuations near the ground during rain
D.A. Aylor and K.M. Ducharme

Lindane volatilization unde field conditions: estimation from residue disappearance and concentration measurements in air
H.-D. Haenel and J. Siebers

VOL. 75, NO. 4 JULY 1995

Research Papers

Windbreak–crop interactions in the Sahel. 1. Dependence of shelter on field conditions
A.J. Brenner, P.G. Jarvis and R.J. van den Beldt 215

Windbreak–crop interactions in the Sahel. 2. Growth response of millet in shelter
A.J. Brenner, P.G. Jarvis and R.J. van den Beldt 235

Scattering of ultraviolet and photosynthetically active radiation by sorghum bicolor: influence of epicuticular wax
R.H. Grant, M.A. Jenks, P.J. Rich, P.J. Peters and E.N. Ashworth 263

Contents of Volume 75 283

FORTHCOMING PAPERS

Wind fluctuations near the ground during rain
D. Aylor and K.M. Ducharme

Lindane volatilization under field conditions: estimation from residue disappearance and concentration measurements in air
H.-D. Haenel and J. Siebers

Effects of water deficits on evapotranspiration from barley
P.D. Jamieson, G.S. Francis, D.R. Wilson and R.J. Martin

Evaporation from bare soil in a temperature humid climate – measurement using micro-lysimeters and time domain reflectrometry
F. Plauborg
